CBE IN THE NEWS:

- Congratulations to Gerald Har for winning 1st prize for Best Student Oral Presentation at the 2019 annual Society for Industrial Microbiology and Biotechnology (SIMB) conference.

UPCOMING CBE THESIS DEFENSE(S):

- 07/03/2019 @ 10:00 AM in 366 CLB: [Camile Diaz](#)

JOBS/RECRUITING:

- **AbbVie**

Location: Illinois, Lake County

Position: [Sr. Scientist I, Engineering \(Sr. Engineer\)](#)

Req.#: D-20-CBE-00001

Brief Description: The successful candidate will play a key role in the Process Chemical Engineering function within Process R&D. The core deliverable of the function is to develop robust commercial processes to manufacture small molecule APIs and ADCs. Selected candidate is expected to address challenging problems in chemical reactions, extractions, distillations, crystallizations, filtration and drying to meet the target chemical and physical property attributes of the product through an in-depth scientific assessment of these unit processes/operations. The candidate is also expected to lead identification and development of novel approaches and technologies to enhance efficiency in process development and commercialization. The candidate must exhibit a collaborative nature in identifying process challenges on a wide range of projects, and take on a leadership role in developing and implementing solutions.

Available positions can be found on the [Chemical & Biomolecular Engineering opportunity website](#), so be sure to check it regularly.
