JOBS/RECRUITING

- **Carleton College**
Position: [Assistant Professor of Chemistry](#)
Job #: 492899
Brief description: The successful candidate will demonstrate a strong commitment to teaching and research with undergraduate students in a liberal arts environment. The position is open to candidates in all areas of chemistry, and we welcome applicants whose interests will enable connections to other departments and interdisciplinary programs at the College and/or with the surrounding community.

Available positions can be found on the Chemical & Biomolecular Engineering [opportunity website](#), so be sure to check it regularly.
