JOBS/RECRUITING

- **The University of Tennessee, Knoxville**
Position: [Assistant Professor of Chemical and Biomolecular Engineering](#)
Brief Description: We seek candidates with expertise in any area of modern chemical engineering and who have the ability to contribute in meaningful ways to the diversity and intercultural goals of the University. Applicants must possess excellent academic credentials and a curriculum vitae that demonstrates the potential to develop a robust research program. A Ph.D. or equivalent doctoral-level degree in chemical engineering or a closely related field is required. The successful candidate will develop an independent and collaborative research program, teach undergraduate and/or graduate courses in chemical and biomolecular engineering, and perform service and outreach to various relevant communities.

Available positions can be found on the Chemical & Biomolecular Engineering [opportunity website](#), so be sure to check it regularly.
