JOBS/RECRUITING

- **Apple**
Position: [Internship, Materials Engineering](#)
Brief description: The Apple internship program gives students tremendous hands on experience developing materials design and laboratory skills which directly impact Apple's line of products. All of Apple's products start with the Materials team working closely with the product designers to develop and specify the best material for each application, whether it is a new high strength alloy, a new recycled polymer material, or the strongest glass available on the market.

All available positions can be found on the Chemical & Biomolecular Engineering [opportunity website](#), so be sure to check it regularly.
