

## **Job Description – R&D Intern**

Join a growing lean manufacturer of specialty coatings, cleaners, and lubricants in suburban Lancaster County. Our growth and personal rewards are built upon the skills, innovation, and dedication of a team driven to perform with passion and excellence.

In this position you will manage projects that support the growth of the business. These projects will include new and improved product development, regulatory issues, production support, and cost/quality improvements. Responsibilities will include project planning, organizing, executing, coordinating, interpreting, and documentation. In addition to typical lab-scale research, evaluation of scale-up and production data and testing will be necessary. You will also be responsible for technical support assistance to all internal and external stakeholders of Stoner Inc.

### **Position Requirements:**

The typical profile for this level would be an individual with two years or more progress towards a BA/BS degree in appropriate Chemistry, Engineering, or closely related technical discipline. The candidate must have excellent communication skills and be able to work both independently and as part of a multidisciplinary team in a timeline-driven environment.

### **Essential Job Functions:**

- Generate product improvement and new product ideas.
- Manage research projects from conception to completion.
- Conduct necessary lab experiments and testing to support research projects.
- Document and communicate project results and oversee scale up and transfer of technology to manufacturing.
- Provide technical support to Sales, Inside Sales, Manufacturing, and Warehouse Teams.
- Prepare samples of test products and Stoner finished goods as needed.

**Location and Schedule:** Quarryville, PA; Monday through Friday 8:30 am - 5:00 pm.

**Compensation:** \$18/hour

**Contact:** Bob Sweger – R&D Director at [bsweger@stonersolutions.com](mailto:bsweger@stonersolutions.com) or (717) 786-7355 ext. 3306.
