

CCST SEMINAR | THURSDAY, OCT. 30 @ 10 AM | 366 CLB

PUBLISHING YOUR RESEARCH AND THE EDITORIAL PROCESS

Xiaoxiao and Maggie are full time professional editors. In their day-to-day they oversee the peer review process, work closely with authors on submissions, and recruit diverse perspectives on key research challenges. They will go over the Cell Press ecosystem, the journals they work at, the publishing process, and any questions about conveying research at large.

Presented by **Cell Press** editors:

XIAOXIAO QIAO

Xiaoxiao earned her PhD in materials and organic chemistry from Indiana University in 2016. She then moved to Argonne National Laboratory and Los Alamos National Laboratory for postdoctoral studies on the applications of catalysts in Li-air batteries, fuel cells, and water electrolyzers. She joined Chem Catalysis in January 2022 and based in Philadelphia, PA. She specializes in organic and organometallic chemistry, homogenous catalysis, and their applications.

MAGGIE FOX

Maggie earned her BS in Materials Chemistry from Binghamton University and her PhD in Materials Science and Engineering from UCLA in 2023. During her studies she primarily focused on solid-state and 3D Li-ion batteries and sol-gel for energy materials. She joined Joule in November 2024 and is based in the New York office. She specializes in batteries and supercapacitors.
