

THE DELAWARE BIOTECHNOLOGY INSTITUTE: **DBI Cores Science as Art**

DBI Cores Science as Art Competition – Call for Submissions

Science is full of unexpected beauty—from nano- and micro-scopic structures to striking data visualizations. We invite all community members, including researchers, students, and staff, to showcase the artistic side of their work performed in the DBI Cores.

Submit artwork (image, data visualization, or artistic representation) from research performed within one of the DBI Cores. The submission should highlight the intersection of science and artistic creativity. Entries will be evaluated on scientific relevance, visual impact, and creativity, and voted on by the public to select compelling works.

Selected works will be featured in our home base, the Ammon-Pinizzotto Biopharmaceutical Innovation Center, and upcoming publications and events, with prizes also being given.

We look forward to seeing the science behind your art!

Submission Deadline: Monday, April 27, 2026

Submission Details

Using QR code below, submit the following items:

- Title of the artwork
- Brief description of the science behind the art
- Core(s) and/or Instrument(s) contributing to the art
- Uploaded file of the artwork

Spring 2026

Powering innovation. Driving impact.
