

# EDITOR INSIGHTS

## •••• NAVIGATING SCIENTIFIC PUBLISHING ••••

Editor  
**Matthew Pavlovich**

Editor in Chief  
**Michelle Muzzio**

**Meet the Editors: Monday, April 27, 2026 - 12:00 - 1:00 PM**

**Ammon Pinizzotto Biopharmaceutical Innovation Center, Seminar Room 140**

Join us for an engaging discussion on publishing high-impact research that covers the applied biological sciences, particularly those bridging engineering and biology.

Matthew earned his PhD in chemical engineering from the University of California at Berkeley, where he studied the biological effects of air plasmas. He studied analytical chemistry as a postdoctoral researcher at Northeastern University, then joined Cell Press in 2016. Matt is a senior manager in the Trends group and has also worked in secondments as the product manager for Cell Press Multi-Journal Submission and as the acting editor-in-chief of STAR Protocols.

Michelle is passionate about translating lab-based innovations into real-world solutions to global challenges. During her PhD at Brown University, she championed research in sustainable chemistry applications of nanoparticle synthesis and published on biomass conversion, electrocatalysis, the degradation of industrial contaminants, and chemical engineering. Since joining Cell Press over 6 years ago, Michelle has led the Earth, Environmental, and Engineering sub-team, where her innate interest in chemistry's impacts beyond the lab deepened, ultimately leading her to launch Chem Circularity as editor-in-chief.
